1 Introduction

In This Document

This document provides schema information about the **FTSE Green Revenues** tables in Quantitative Analytics.

NOTE

For information about the other Quantitative Analytics tables, refer to the other Database Schema documents posted on the [Quantitative Analytics](#) product page on [MyAccount](#).

The documentation for each table includes these main elements:

- **Vendor Database or License Name** – This element provides the vendor database or license name. Vendor databases generally correspond to vendor licensing options.
- **Table Name: Table Title** – This element provides the table name and title, followed by a description of the table contents.
- **Update Cycle** – This element indicates the frequency of updates from the data vendor. (For specific information about when this update is posted for your use, refer to your update logs. The update log schema description is available in the Database Schema for Quantitative Analytics Core Tables document.)
- **Adjusted** – This element indicates whether the data is stored adjusted, unadjusted, or if adjustment is not applicable (N/A).
- **Indexes, Index Fields** – This element lists the table's index(es) (for example, pkey_CSGCAD) and the index fields. The primary index contains a "pkey_" or "PK_" prefix. Clustered indexes are noted.
Note: Indexes are not applicable for Snowflake.
- **Field, Type, Nullable, Definition** – This element describes the table's fields, including field names, data types, and whether each field is nullable. The data types in Snowflake have equivalents available. For example, an *int* in SQL Server is a *number* in Snowflake.

Intended Readership

This document is intended for Quantitative Analytics clients licensed to use **FTSE Green Revenues** data through LSEG. Note that the tables described in this document may be covered by several licenses; your access to the data in these tables is dependent on the licenses you have. Readers should have basic knowledge of Microsoft SQL Server 2016.

Table Name Conventions

In Quantitative Analytics, database tables are grouped by name. Generally, the first few letters of the table name refer to the data vendor or licensing group. For example, all tables beginning with **GR*** are the Green Revenues data tables.

Pervasive and Oracle

This document is specific to Microsoft SQL Server 2016. If you are accessing the data directly through the Pervasive database, you may encounter slight differences in index names and data types. Please note that references to Pervasive and Actian are synonymous.

If you are accessing the data through Oracle, note that field names that correspond to Oracle reserved words are appended with an underscore. For example, field names "Number", "Synonym", and "UID" become "Number_", "Synonym_", and "UID_" in Oracle.

Zero Values and Nulls

Null values are usually recorded as "NULL". Occasionally, a table may contain a value of "-99999" or "-9999"; in these cases, there is no recorded data for that period. (It is null.) If the table contains a "0" value, the data was reported as having a "0" value.

Service and Support

[MyAccount](#) is the LSEG portal that provides a single access point for timesaving support services, along with billing, user management, and information.

Statement of Service

The [Quantitative Analytics Service Description](#) is available on the [Quantitative Analytics](#) product page at MyAccount.

Subscribe to Support Channels

You are encouraged to [subscribe](#) to the following support channels to keep informed of changes to products and data, and to be notified of any service issues or change. Please see the *Alerts and Notifications* section in the *Quantitative Analytics Service Description* available on the [Quantitative Analytics](#) product page at MyAccount for detailed instructions.

- **Change Notifications**
 - **Product Change Notifications (PCNs)** detail new, enhanced, or changed functionality, which may require your action, in products that you use.
 - **Data Notifications (DNs)** alert you to upcoming changes to real-time and historical data across all asset classes that are relevant to you.
 - **RIC Change Events** inform you of planned changes to RICs. RIC is the market level identifier key unique to LSEG used to identify securities.
- **Service Alerts**
Alert you about planned maintenance and unplanned service issues affecting your products and services, and be notified via SMS or email.

Documentation

You can access product documentation on the [Quantitative Analytics](#) product page at MyAccount.

Get Support

For support using Quantitative Analytics, please use one of the following methods:

Online

Access [Get Support](#) either via the blue [Get Support](#) button at the top right of each page or by selecting *Get Support* located under *Help and Support* on the left navigation pane at MyAccount.

From the *Get Support* page, choose *Get Product and Content Support* and then select the appropriate category from the next page. Complete the request making sure to include the following:

- Under Product, select Quantitative Analytics from the dropdown list.
- In the **How can we help you?** text box, include the following information:
 - Content set name (i.e. Worldscope)
 - Date applicable to a content inquiry
 - Table names and relevant fields
 - Security code (i.e. QA-ID, PermID, Sedol, InfoCode, etc.)
 - Script used to generate the output
 - Any other supporting detail

Telephone

Region	Telephone	Options
AMERS	+01 866 427 8390	Option 1 – Product Support Option 2 – Technical Support

Feedback

We invite your comments, corrections, and suggestions about this document: access the [Feedback](#) option under [Get Support](#) at MyAccount. Your feedback helps us continue to improve our user assistance.

Your Personal Information

LSEG is committed to the responsible handling and protection of personal information. We invite you to review our [Privacy and Cookie Statement](#), which describes how we collect, use, disclose, transfer, and store personal information when needed to provide our services and for our operational and business purposes.

2. FTSE Green Revenues Data

GRFinPerDet: Financial Period Details

This table contains financial period details.

Update Cycle: Monthly

Adjusted: N/A

Indexes		Index Fields	
pkey_GRFinPerDet (Clustered)		OrgPermID, PerID	

Field	Type	Nullable	Description
OrgPermID	bigint	N	Organization ID represents the permanent identifier (Perm ID) of an organization assigned to each unique entity. The Perm ID is unique for an entity and remains unchanged.
PerID	bigint	N	Period ID is associated with the period end date used to report the financial data of the business at the end of the financial period for annual and interims. Period end date differs for each company, however, most of the financial periods are based on the tax period of the country in order to easily track corporate tax filing.
FY	int	Y	Fiscal Year is associated with the financial year based on the annual period end of the company. Period end date differs for each company, however, most of the financial periods are based on the tax period of the country in order to easily track corporate tax filing. Fiscal Year is collected in the format YYYY and generally it is associated with the year of the period end date. For example, if the period end is 03/31/2020, then the fiscal year is 2020. However, the annual cut-off date is 15th January, which will fall under the previous year. For example, 01/10/2021 will fall under fiscal year 2020.
PerStrtDt	date	Y	Period Start Date is the start date of the associated financial period.
PerEndDt	date	Y	Period End Date is the end date of the financial period that a company selects to close the financial accounts of its business. The period end date differs for each company, however, most of the financial periods are based on the tax period of the country in order to easily track corporate tax filing.

GRSummDet: Company Summary Data

This table contains company's summary data.

Update Cycle: Monthly

Adjusted: N/A

Indexes		Index Fields	
pkey_GRSummDet (Clustered)		OrgPermID, PerID	

Field	Type	Nullable	Description
OrgPermID	bigint	N	Organization ID represents the permanent identifier (Perm ID) of an organization assigned to each unique entity. The Perm ID is unique for an entity and remains unchanged.
PerID	bigint	N	Period ID is associated with the period end date used to report the financial data of the business at the end of the financial period for annual and interims.

Field	Type	Nullable	Description
			Period end date differs for each company, however, most of the financial periods are based on the tax period of the country in order to easily track corporate tax filing.
CrtDdt	datetime2	Y	This indicates the datetime when the green revenue numbers were first distributed for the period.
EstEUTaxEligRvnPct	double	Y	Estimated green revenue percentage eligibility with European Union taxonomy.
EstTypCode	varchar(50)	Y	Estimation Type Code indicates if the sector revenues were disclosed by the company or derived by the analyst using the estimation methodology.
GRPct	double	Y	Reported or estimated green revenue as a proportion of total revenue.
LstModDt	datetime2	Y	This indicates the datetime when the green revenues were last modified for the fiscal year.
MaxGRExNclrPct	double	Y	Estimated maximum green revenue percentage for ex nuclear.
MaxGRPct	double	Y	Estimated maximum green revenue percentage.
MinGRExNclrPct	double	Y	Estimated minimum green revenue percentage for ex nuclear.
MinGRPct	double	Y	Estimated minimum green revenue percentage.
RepRevAmt	double	Y	Reported Revenue Amount is the value reported by the company for a given financial year.
RepRevISOCurrCode	char(3)	Y	Reported Revenue ISO Currency Code.
Tier1and2GRPct	double	Y	Reported or estimated tier 1 and 2 green revenue as a proportion of total revenue.
Tier1GRPct	double	Y	Reported or estimated tier 1 green revenue as a proportion of total revenue.
Tier2GRPct	double	Y	Reported or estimated tier 2 green revenue as a proportion of total revenue.
Tier3GRPct	double	Y	Reported or estimated tier 3 green revenue as a proportion of total revenue.
CorpCommFlg	nvarchar(150)	Y	This is a placeholder for a new element to be added to the summary file later in Q3.

GRSecRev: Sector Level Information and Revenue Percentage

This table contains sector-level information and the associated revenue percentage.

Update Cycle: Monthly

Adjusted: N/A

Indexes		Index Fields	
pkey_GRSecRev (Clustered)		OrgPermID, PerID, SecCode	

Field	Type	Nullable	Description
OrgPermID	bigint	N	Organization ID represents the permanent identifier (Perm ID) of an organization assigned to each unique entity. The Perm ID is unique for an entity and remains unchanged.
PerID	bigint	N	Period ID is associated with the period end date used to report the financial data of the business at the end of the financial period for annual and interims. Period end date differs for each company, however, most of the financial periods are based on the tax period of the country in order to easily track corporate tax filing.
SecCode	smallint	N	Sector Code uniquely identifies the green sector from which the company is generating revenues. This maps to the Item number from the GRItem table corresponding to the Sector Code (Feed Field Name).

Field	Type	Nullable	Description
SecRevPct	double	Y	Reported or estimated green revenue from the sector as a proportion of total revenue.

GRCode: Integer Code Descriptions

This table contains descriptions for the integer codes.

Update Cycle: Monthly

Adjusted: N/A

Indexes	Index Fields
pkey_GRCode (Clustered)	Type_, Code

Field	Type	Nullable	Description
Type_	int	N	Enlists types of codified data items.
Code	bigint	N	Code represents the Value_ data item from any Green Revenue data.
Desc_	varchar(500)	Y	Contains the coded data item description.

GRItem: Green Revenue Metadata

This table contains the metadata of all Green Revenue metrics and Green Revenue Sector hierarchical level.

Update Cycle: Monthly

Adjusted: N/A

Indexes	Index Fields
pkey_GRItem (Clustered)	

Field	Type	Nullable	Description
Item	smallint	N	An item code to uniquely identify each GR metric that is a part of the feed.
FeedFieldName	varchar(100)	Y	Internal LSEG source feed field name.
Title	varchar(200)	Y	Description pertaining to the Item.
Description	varchar(1000)	Y	Detailed description pertaining to the Item.
DataType	varchar(20)	Y	This indicates the datatype of the GR metric.
Units	varchar(100)	Y	This indicates the unit of the data metric value.
Hierarchy	varchar(20)	Y	This identifies the hierarchy of the GR metric.
Polarity	varchar(30)	Y	This indicates whether a higher data measure value is positive or negative.
SecType	varchar(50)	Y	This code identifies the hierarchical level of the Sector Codes within the Green Revenue Classification Schema. Schema has 3 levels: at the top level of the Schema there are 10 Sectors followed by 64 Sub Sectors and then, at the most granular level, there are 133 Micro Sectors.
ParentSecCode	varchar(30)	Y	This code indicates the Parent Node of the Sector. When Sector is top level that is Green Revenue Sector, then Parent Code would be NULL.
Tier	tinyint	Y	Tiering identifies the overall environmental impact associated with the green activity: – Tier 1 covers activities with significant and clear environmental benefits – Tier 2 covers activities with more limited but net positive environmental benefits – Tier 3 covers activities (micro sectors) which have some environmental benefits but are overall net neutral or negative.
