1 Introduction

In This Document

This document provides schema information about the **MarketPsych Analytics** data tables in LSEG Quantitative Analytics.

NOTE

For information about the other Quantitative Analytics tables, refer to the other Database Schema documents posted on the [Quantitative Analytics](#) product page on [MyAccount](#).

The documentation for each table includes these main elements:

- **Vendor Database or License Name** – This element provides the vendor database or license name. Vendor databases generally correspond to vendor licensing options.
- **Table Name: Table Title** – This element provides the table name and title, followed by a description of the table contents.
- **Update Cycle** – This element indicates the frequency of updates from the data vendor. (For specific information about when this update is posted for your use, refer to your update logs. The update log schema description is available in the Database Schema for Quantitative Analytics Core Tables document.)
- **Adjusted** – This element indicates whether the data is stored adjusted, unadjusted, or if adjustment is not applicable (N/A).
- **Indexes, Index Fields** – This element lists the table's index(es) (for example, pkey_CSGCAD) and the index fields. The primary index contains a "pkey_" or "PK_" prefix. Clustered indexes are noted.
- **Field, Type, Nullable, Definition** – This element describes the table's fields, including field names, data types, and whether each field is nullable. The data types in Snowflake have equivalents available. For example, an *int* in SQL Server is a *number* in Snowflake.

Intended Readership

This document is intended for Quantitative Analytics clients licensed to use **MarketPsych Analytics** data through LSEG. Note that the tables described in this document may be covered by several licenses; your access to the data in these tables is dependent on the licenses you have. Readers should have basic knowledge of Microsoft SQL Server 2016.

Table Name Conventions

In Quantitative Analytics, database tables are grouped by name. Generally, the first few letters of the table name refer to the data vendor or licensing group. For example, tables that begin with **MPI*** are **MarketPsych Analytics** data tables.

Zero Values and Nulls

Null values are usually recorded as "NULL". Occasionally, a table may contain a value of "-99999" or "-9999"; in these cases, there is no recorded data for that period. (It is null.) If the table contains a "0" value, the data was reported as having a "0" value.

Service and Support

[MyAccount](#) is the LSEG portal that provides a single access point for timesaving support services, along with billing, user management, and information.

Statement of Service

The [Quantitative Analytics Service Description](#) is available on the [Quantitative Analytics](#) product page at MyAccount.

Subscribe to Support Channels

You are encouraged to [subscribe](#) to the following support channels to keep informed of changes to products and data, and to be notified of any service issues or change. Please see the *Alerts and Notifications* section in the *Quantitative Analytics Service Description* available on the [Quantitative Analytics](#) product page at MyAccount for detailed instructions.

- **Change Notifications**
 - **Product Change Notifications (PCNs)** detail new, enhanced, or changed functionality, which may require your action, in products that you use.
 - **Data Notifications (DNs)** alert you to upcoming changes to real-time and historical data across all asset classes that are relevant to you.
 - **RIC Change Events** inform you of planned changes to RICs. RIC is the market level identifier key unique to LSEG used to identify securities.
- **Service Alerts**
Alert you about planned maintenance and unplanned service issues affecting your products and services, and be notified via SMS or email.

Documentation

You can access product documentation on the [Quantitative Analytics](#) product page at MyAccount.

Get Support

For support using Quantitative Analytics, please use one of the following methods:

Online

Access [Get Support](#) either via the blue [Get Support](#) button at the top right of each page or by selecting *Get Support* located under *Help and Support* on the left navigation pane at MyAccount.

From the *Get Support* page, choose *Get Product and Content Support* and then select the appropriate category from the next page. Complete the request making sure to include the following:

- Under Product, select Quantitative Analytics from the dropdown list.
- In the **How can we help you?** text box, include the following information:
 - Content set name (i.e. Worldscope)
 - Date applicable to a content inquiry
 - Table names and relevant fields
 - Security code (i.e. QA-ID, PermID, Sedol, InfoCode, etc.)
 - Script used to generate the output
 - Any other supporting detail

Field	Type	Nullable	Description
AstId	int	No	DIS Generated Asset ID.
AstCode	varchar(20)	Yes	Represents the code used to denote the asset scored. MarketPsych-originated code.
AstDesc	varchar(200)	Yes	Description of the Asset.
AstDomCls	varchar(15)	Yes	Asset Domicile Classification.
AstCat	varchar(35)	Yes	Asset Categorization.

MPICurInfo

This table contains currencies' assets information.

Update Cycle: Daily

Adjusted: N/A

Indexes		Index Fields	
pkey_MPICurInfo (clustered)		AstId	

Field	Type	Nullable	Description
AstId	int	No	DIS Generated Asset ID.
AstCode	char(3)	Yes	Represents the code used to denote the asset scored. Three-character ISO-4217 code.
AstDesc	nvarchar(50)	Yes	Description of the Asset

MPICmdtyInfo

This table contains commodities' (agricultural and energy and material) assets information.

Update Cycle: Daily

Adjusted: N/A

Indexes		Index Fields	
pkey_MPICmdtyInfo (clustered)		AstId	

Field	Type	Nullable	Description
AstId	int	No	DIS Generated Asset ID.
AstCode	varchar(10)	Yes	Represents the code used to denote the asset scored. LSEG Topic Code.
AstDesc	varchar(30)	Yes	Description of the Asset.
CmdtyType	char(3)	Yes	Indicates the Commodity Type. Corresponding code description is in the MPIDesc table. Commodity Type can take one of the following values: – 1: AGR - Agricultural commodities – 2: EGR - Energy & material commodities Cross-reference CmdtyType with MPIDesc.Code where Type_ = 5.

MPICntryInfo

This table contains countries' assets information.

Update Cycle: Daily

Adjusted: N/A

Indexes		Index Fields	
pkey_MPICntryInfo (clustered)		AstId	

Field	Type	Nullable	Description
AstId	int	No	DIS Generated Asset ID
AstCode	varchar(3)	Yes	Represents the code used to denote the asset scored. LSEG topic code, referring to the home country. Also corresponds to ISO 3166-1 code.
AstDesc	nvarchar(50)	Yes	Description of the Asset

MPICntryMrktInfo

This table contains country markets' assets information.

Update Cycle: Daily

Adjusted: N/A

Indexes		Index Fields	
pkey_MPICntryMrktInfo (clustered)		AstId	
Field	Type	Nullable	Description
AstId	int	No	DIS Generated Asset ID.
AstCode	varchar(3)	Yes	Represents the code used to denote the asset scored. LSEG topic code, referring to the home country. Also corresponds to ISO 3166-1 code.
AstDesc	nvarchar(50)	Yes	Description of the Asset

MPICmpStatus

This table contains the changes to company tracking status.

Update Cycle: Monthly

Adjusted: N/A

Indexes		Index Fields	
pkey_MPICmpStatus (clustered)		OrgPermId, Date_	
Field	Type	Nullable	Description
OrgPermId	bigint	No	LSEG organizational PermId.
Date_	datetime	No	Change Date.
OrgName	varchar(100)	Yes	Company Name.
TrackingStatus	varchar(10)	Yes	"Active" if the PermId may be scored in a live feed. Otherwise "Inactive".

MPICmpAmerData

This table contains index scores for the company asset class in the AMER region. The index scores comprise of emotional indicators, macroeconomic metrics and buzz metrics based on references in news and social media.

Update Cycle: Daily

Adjusted: N/A

Indexes		Index Fields	
pkey_MPICmpAmerData (clustered)		OrgPermId, DataType, Date_, WindowHour	
Field	Type	Nullable	Description
OrgPermId	bigint	No	Organization Perm ID.
DataType	tinyint	No	Represents the type of content source(s) on which these MIs are based. Corresponding Type_ code in the MPICode table. DataType can take one of the following values: – "News" for news – "Social" for social media – "News_Social" for the combined content Cross-reference DataType with MPICode.Code where Type_ = 2.
Date_	datetime	No	Represents the date of content aggregation window. The time zone is GMT/UTC.
