1 Introduction

In This Document

This document provides schema information about the **Short Interest** data tables in Quantitative Analytics.

NOTE

For information about the other Quantitative Analytics tables, refer to the other Database Schema documents posted on the [Quantitative Analytics](#) product page on [MyAccount](#).

The documentation for each table includes these main elements:

- **Vendor Database or License Name** – This element provides the vendor database or license name. Vendor databases generally correspond to vendor licensing options.
- **Table Name: Table Title** – This element provides the table name and title, followed by a description of the table contents.
- **Update Cycle** – This element indicates the frequency of updates from the data vendor. (For specific information about when this update is posted for your use, refer to your update logs. The update log schema description is available in the Database Schema for Quantitative Analytics Core Tables document.)
- **Adjusted** – This element indicates whether the data is stored adjusted, unadjusted, or if adjustment is not applicable (N/A).
- **Indexes, Index Fields** – This element lists the table's index(es) (for example, pkey_CSGCAD) and the index fields. The primary index contains a "pkey_" or "PK_" prefix. Clustered indexes are noted.
- **Field, Type, Nullable, Definition** – This element describes the table's fields, including field names, data types, and whether each field is nullable. The data types in Snowflake have equivalents available. For example, an *int* in SQL Server is a *number* in Snowflake.

Intended Readership

This document is intended for Quantitative Analytics clients licensed to use **Short Interest** data through LSEG. Note that the tables described in this document may be covered by several licenses; your access to the data in these tables is dependent on the licenses you have. Readers should have basic knowledge of Microsoft SQL Server 2016.

Table Name Conventions

In Quantitative Analytics, database tables are grouped by name. Generally, the first few letters of the table name refer to the data vendor or licensing group. For example, all tables that begin with **ShortInt2*** are **Short Interest** tables.

Pervasive and Oracle

This document is specific to Microsoft SQL Server 2016. If you are accessing the data directly through the Pervasive database, you may encounter slight differences in index names and data types. Please note that references to Pervasive and Actian are synonymous.

If you are accessing the data through Oracle, note that field names that correspond to Oracle reserved words are appended with an underscore. For example, field names "Number", "Synonym", and "UID" become "Number_", "Synonym_", and "UID_" in Oracle.

Zero Values and Nulls

Null values are usually recorded as "NULL". Occasionally, a table may contain a value of "-99999" or "-9999"; in these cases, there is no recorded data for that period. (It is null.) If the table contains a "0" value, the data was reported as having a "0" value.

Service and Support

[MyAccount](#) is the LSEG portal that provides a single access point for timesaving support services, along with billing, user management, and information.

Statement of Service

The [Quantitative Analytics Service Description](#) is available on the [Quantitative Analytics](#) product page at MyAccount.

Subscribe to Support Channels

You are encouraged to [subscribe](#) to the following support channels to keep informed of changes to products and data, and to be notified of any service issues or change. Please see the *Alerts and Notifications* section in the *Quantitative Analytics Service Description* available on the [Quantitative Analytics](#) product page at MyAccount for detailed instructions.

- **Change Notifications**
 - **Product Change Notifications (PCNs)** detail new, enhanced, or changed functionality, which may require your action, in products that you use.
 - **Data Notifications (DNs)** alert you to upcoming changes to real-time and historical data across all asset classes that are relevant to you.
 - **RIC Change Events** inform you of planned changes to RICs. RIC is the market level identifier key unique to LSEG used to identify securities.
- **Service Alerts**
Alert you about planned maintenance and unplanned service issues affecting your products and services, and be notified via SMS or email.

Documentation

You can access product documentation on the [Quantitative Analytics](#) product page at MyAccount.

Get Support

For support using Quantitative Analytics, please use one of the following methods:

Online

Access [Get Support](#) either via the blue [Get Support](#) button at the top right of each page or by selecting *Get Support* located under *Help and Support* on the left navigation pane at MyAccount.

From the *Get Support* page, choose *Get Product and Content Support* and then select the appropriate category from the next page. Complete the request making sure to include the following:

- Under Product, select Quantitative Analytics from the dropdown list.
- In the **How can we help you?** text box, include the following information:
 - Content set name (i.e. Worldscope)
 - Date applicable to a content inquiry
 - Table names and relevant fields
 - Security code (i.e. QA-ID, PermID, Sedol, InfoCode, etc.)
 - Script used to generate the output
 - Any other supporting detail

Telephone

Region	Telephone	Options
AMERS	+01 866 427 8390	Option 1 – Product Support Option 2 – Technical Support
EMEA	+44 203 341 1036	
APAC	+65 6403 7436	

Feedback

We invite your comments, corrections, and suggestions about this document: access the [Feedback](#) option under [Get Support](#) at MyAccount. Your feedback helps us continue to improve our user assistance.

Your Personal Information

LSEG is committed to the responsible handling and protection of personal information. We invite you to review our [Privacy Statement](#), which describes how we collect, use, disclose, transfer, and store personal information when needed to provide our services and for our operational and business purposes.

2. Short Interest Data Tables

NOTE: The ShortInt2* tables are the recommended source for short interest data. These tables are available as of version 6.3. If you are using a version prior to 6.3, please contact [support](#) for an upgrade.

ShortInt2Code: Numeric Codes

This table contains descriptions of numeric codes.

Update Cycle: Once monthly on approximately the 20th day of each month.

Adjusted: No

Indexes		Index Fields	
pkey_ShortInt2Code (Clustered)		Type_, Code	
Field	Type	Nullable	Description
Type_	int	N	Type_ is a numeric code for a type of data.
Code	int	N	Code is a coded value for an element of Type_. When Type_ = 0, Code is the numeric code for each Type_ other than 0 and Desc_ is a description of each Type_.
Desc_	varchar(50)	Y	Desc_ is a plain-language description of the element defined by Type_ and Code.

ShortInt2Data: Monthly Short Interest Data

Use this table to retrieve Short Interest data from the NYSE, NASDAQ, AMEX, ARCA, and/or OTC.

Update Cycle: Twice a month.

Adjusted: No

Indexes		Index Fields	
pkey_ShortInt2Data (Clustered)		Code, Exch, Date_	
Field	Type	Nullable	Description
Code	int	N	Code is the equity identifier provided by the vendor. ShortInt2Data.Code joins directly to SecMstrX.SecCode.
Exch	int	N	Exch indicates the exchange and may be: NYSE (1), NASDAQ (2), AMEX (3), ARCA (4), or OTC (5).
Date_	smalldatetime	N	Date_ is the settlement date.
Shares	float	Y	Shares is the monthly short interest.
Volume	float	Y	Volume is the number of shares traded on the specified date, or within the specified period.
Ticker	varchar(9)	Y	Ticker represents BaseTicker + Group_ + Series, concatenated (blank spaces removed).
LicFlag	smallint	N	LicFlag is the license flag that identifies to which entitlement package each data row belongs. LicFlag may be: NYSE (1), NASDAQ (2), AMEX (4), ARCA (8), or OTC (16).

ShortInt2Desc: Character Code Descriptions

This table contains descriptions of character codes.

Update Cycle: Once monthly on approximately the 20th day of each month.

Adjusted: No

Indexes		Index Fields	
pkey_ShortInt2Desc (Clustered)		Type_, Code	

Field	Type	Nullable	Description
Type_	int	N	Type_ is a numeric code for a type of data.
Code	varchar(10)	N	Code is a coded value for an element of Type_. When Type_ = 0, Code is the numeric code for each Type_ other than 0 and Desc_ is a description of each Type_.
Desc_	varchar(128)	Y	Desc_ is a plain-language description of the element defined by Type_ and Code.

3. Legacy Short Interest Data Tables

prc.ShortInt and dbo.ShortInt: Monthly Short Interest (Legacy)

NOTE: prc.ShortInt and dbo.ShortInt are legacy short interest tables. These tables will be discontinued in the future on a date yet to be determined. Clients will be notified of the date when it is known.

It is recommended that you use the ShortInt2* tables instead. The ShortInt2* tables are available as of version 6.3. If you are using a version prior to 6.3, please contact [support](#) for an upgrade.

You can use the legacy ShortInt tables to retrieve short interest data from the NYSE, NASDAQ, and AMEX. The table you use depends on the database version you are using. For LSEG Quantitative Analytics database versions 5.86 through 6.2, use dbo.ShortInt. For versions 5.85 and earlier, use prc.ShortInt.

To determine the version number of your database, use this query:

```
select * from tqa_version where name_ = 'qadirect'
```

Your version number is [MajorVersion.MinorVersion].

Update Cycle: Twice a month.

Adjusted: No

Indexes		Index Fields	
pkey_ShortInt (Clustered)		Code, Exch, Date_	

Field	Type	Nullable	Description
Code	int	N	In prc.ShortInt, Code is the primary link across all Prc* tables. In dbo.ShortInt, for LSEG Quantitative Analytics database 5.86 through 6.2, Code is the primary link across the SecMapX and SecMstrX tables. For information about the SecMapX and SecMstrX tables, refer to the Database Schema for LSEG Quantitative Analytics Core Tables document posted on the LSEG Quantitative Analytics product page on MyAccount .
Exch	int	N	Exch indicates the exchange and may be: 1 (NYSE), 2 (NASDAQ), 3 (AMEX), or 4 (Arca).
Date_	smalldatetime	N	Date_ is the settlement date.
Shares	float	Y	Shares are the monthly short interest.
Volume	float	Y	Volume is the number of shares traded on the specified date, or within the specified period.
Ticker	varchar(8)	Y	Ticker represents BaseTicker + Group_ + Series, concatenated (blank spaces removed).
